

SIINN

Safe Implementation of Innovative Nanoscience and Nanotechnology

FP7-ERA-NET on Nanotechnologies, including Nanotoxicology

Objectives

- › Promotion of rapid transfer of the results of nanoscience and nanotechnology research into industrial applications
- › Appraisal of current nanosafety status
- › Identification of knowledge gaps in order to identify potential call topics
- › Implementation of two joint transnational research calls
- › Benchmarking and validation of existing risk assessment methods for human health and environmental safety
- › Liaison with European and global initiatives, roadmapping, communication
- › Strengthening of the European competitiveness in the field of nanoscience and nanotechnology

Further Details

- › Contract period: August 2011 – July 2014
- › Participants: 19 partners from 10 EU Member States, 3 EU Regions, Switzerland, and Israel
- › First joint SIINN call is intended to be published in March 2012
